# PREMISE

This document provides a number of downloadable sample preset files in the context of the **ESA Space Solutions** branding.

In order to create other versions on top of the examples provided we recommend an ad-hoc production of the file, through the use of a professional design software.

Nevertheless, this document allows a certain degree of customisation of the samples provided, through the usage of editable fields.

Before attempting any kind of customisation, please make sure you have installed on your device the official corporate ESA font (Notes ESA).

You can download Notes ESA from the link below.
